Quigley Safety Policy for Smokeless Shooters

If you shoot any double-based smokeless powder, we do not consider loads using an over-powder wad (cotton, Dacron, card wad, and whatever) as a safe load. We have had cotton balls and toilet paper catch the grass on fire. Most popular at the Quigley is AA 5744. It is designed to not be position sensitive in the cartridge case and needs no over powder wad for accuracy. Do not bring any such loaded cartridges as match or practice ammunition. More information is provided on the Quigley website. Thank you for your compliance.
